**THE CYCLE OF THE ELEMENTS: AN EXPLORATION OF FIVE ELEMENT DIAGNOSIS
AND TREATMENT PROCEDURES**

with Nora Franglen, Sarah Matheson and Guy Caplan

Autumn seminars to be held in London and Hove

These seminars are suitable for both students of acupuncture, qualified acupuncturists, whatever branch of acupuncture they practise, and practitioners of other disciplines who wish to widen their knowledge of the elements. They are intended to stimulate your understanding of how the elements appear in each one of us, and encourage participants who want to hone their five element skills and learn more about the elements to explore this very powerful and sensitive discipline further.

The seminars are in two parts: Part 1, Exploring the Elements, will look at each element in detail. Part 2, Clinical Days, will offer the participants the chance to observe the diagnosis and treatment of patients, with discussion of treatment planning and point selection. The seminars can be attended either singly or as a group, in which case a discount applies.
